

## 7L Manual Fluid Extractor - manual

is made of composite materials and is suitable for the extraction of all types of engine and lubricating oils from cars, motorcycles, marine engines, stationary engines and industrial machinery. It is also suitable for low viscosity liquids like water. Suitable for temperatures up to 80°C. Due to its manual nature no compressor or electricity is required. Due to its safety design pumping stops once the tank is full. Fast, clean and easy to use.,

Technical specifications:	
Color:	white
Capacity:	7L
Material:	PP
Application:	Oil Change, Fluid Extraction
Size:	25*25*68 cm
Weight:	3,5 kg
Automation:	manual
PCS/Carton:	1
Suitable for:	<ul style="list-style-type: none"> <li>• engine oil</li> <li>• brake fluid</li> <li>• gear oil</li> <li>• coolant liquid</li> <li>• power steering fluid</li> <li>• water</li> </ul>
